

Microsoft Licensing Body of Knowledge 2021

Exam preparation course – online

Overview

The Microsoft Licensing Body of Knowledge 2021 Exam enables licensing specialists to demonstrate that they've got a great knowledge of Microsoft licensing across on-premises products, Online Services and Azure services, and all the different ways that customers can buy them. The objective of this course is to prepare individuals to successfully prepare for and pass this exam across three 90-minute sessions.

Approach

All candidates preparing to take the Microsoft Licensing Body of Knowledge 2021 Exam will have a different level of knowledge, with different strengths and weaknesses. This course helps attendees to:

- Understand the topics covered in the exam and the required level of knowledge for those topics
- Identify the gaps in their existing knowledge
- Prepare a personalised revision plan to complete after the course

Course materials

All attendees will be provided with the following resources:

- Exam preparation course workbook
- Access to 9 knowledge-check tests and 3 sample exams

Agenda

Session 1 – Buying and licensing on-premises products

- Products included in the exam
- Advanced topics: Dynamics on-premises, Azure DevOps Server, buying through an EA
- Example exam questions
- Building a personal revision plan

Session 2 – Buying and licensing Online Services products

- Products included in the exam
- Advanced topics: Dynamics 365, Power Platform, comparing the ways to buy the Online Services
- Example exam questions
- Building a personal revision plan

Session 3 – Buying and licensing Azure services

- Products included in the exam
- Advanced topics: Windows/SQL virtual machines, SQL PaaS solutions, Dev/Test solutions, license deployment options
- Example exam questions
- Building a personal revision plan

Pre-requisites

All attendees should complete the modules in the [BOK21 Get Licensing Ready Knowledge Check](#) to ensure a minimum level of knowledge of some key concepts.
