

Licensing Power Automate

Introduction to Power Automate

Power Automate helps organizations automate their business processes across modern systems with APIs as well as legacy apps without APIs, driving end-to-end automation solutions from simple approvals to complex workflows.

Type of automation

- Automation of modern applications via API-based Digital Process Automation is known as a **cloud flow**.
- UI-based Robotic Process Automation is known as a **desktop flow**. Desktop flows may be run in **attended mode** where the flow runs on a user's desktop initiated by the user, or **unattended mode** where flows are triggered automatically in the background with no user logged in.

Additional resources

The **Power Platform Licensing Guide** is an excellent resource. It is updated frequently and can be found here: <https://bit.ly/2LNyW8F>.

The **Power Platform Licensing Deck** is useful for further information and can be found here: <https://bit.ly/3pTocVS>.

Note: PartnerSource access is required

Licensing cloud and desktop flows

Power Automate Premium

\$15 per user per month

Licensed users may create and access:

- Unlimited cloud flows
- Unlimited desktop flows in attended mode

Power Automate Process

\$150 per bot per month

Licenses a single automation bot that can be used for:

- Unattended desktop flows
- A single cloud flow that can be accessed by unlimited users in an organization

Power Automate Pay-As-You-Go meters

Tiers	Per unique flow run
Cloud flows:	\$0.60
Attended desktop flows:	\$0.60
Unattended desktop flows:	\$3.00

Consumption is billed monthly against a nominated **Azure Subscription**

Power Automate Hosted RPA Add-on

\$215 per bot per month

An Add-on to a Power Automate Premium license that allows users to run desktop flows as a service with hosted machine options

Power Automate Process Mining

Power Automate Process Mining is a tool which can help customers to understand what is happening across their business and to reduce the complexity of their processes.

Licensing Process Mining

Organizations can get started with Power Automate Process Mining using the entitlements in the Power Automate Premium license. Each **Power Automate Premium** license accrues 50 MB of Process Mining data storage up to a cap of 100 GB per tenant.

A **Process Mining Add-on** to a Power Automate Premium license may also be purchased for an additional 100 GB of data storage, costing \$5,000 per tenant per month

Dataverse

Dataverse lets you store and manage data used by Power Apps. Flows utilising Dataverse will consume varying quantities of Dataverse Database, File, and Log capacity.

Power Automate Premium and Process

The first Power Automate Premium or Process license receives default capacity assigned to a tenant, and then further licenses accrue additional capacity across the tenant. Capacity Add-on licenses are also available to purchase extra capacity in increments of 1 GB.

Power Automate Premium

Capacity	Default	Accrued
Database	10 GB	250 MB
File	20 GB	2 GB
Log	2 GB	-

Power Automate Process

Capacity	Default	Accrued
Database	5 GB	50 MB
File	2 GB	200 MB
Log	200 MB	-

Pay-As-You-Go

There is no default or accrued capacity associated with a PAYG environment; all Dataverse capacity usage is charged on Database, File or Log capacity meters.
