Operations – Order Lines^{1, 2}

- \$500 tenant/month, billed annually

For qualifying transaction types, license indirect access by automated systems, IoT devices, and bots on an 'order line' basis.

¹ To qualify for Operations – Order Lines licensing, a transaction must be indirect access (direct access of the Dynamics application do not qualify) and only update data within the qualifying designated tables. Access to any other tables or user actions requires an appropriate D365 license. See [Dynamics 365 Licensing Guide](#) for full details.

² Includes 100K order line transactions per tenant/month; enforced annually and can be consumed at any point in the year. Annual subscription license required.

Base license: When purchasing multiple Dynamics 365 applications for a single user, the first application license must be the highest priced license (a.k.a. base license) for the named user. Every full-access user must have a base license.

Attach license: Dynamics 365 attach license pricing is available for users who require multiple Dynamics 365 applications. Attach licenses may only be assigned to users with an appropriate qualifying base license. A named user may have more than one attach license.

Note:

- Base and attach licenses are **identical in their core capabilities** and are only differentiated in price.
- Attach licenses **do not include additional capacity entitlements**.¹
- **Exception** - Business Premium base licensed users (\$100 user/month, billed annually) are eligible to add Customer Service Enterprise, Field Service, or Sales Enterprise at the \$20 user/month, billed annually attach pricing.

¹Customer Insights Attach SLs include the same default capacity entitlements as Customer Insights Base SLs.

Definitions:

Interacted People - Interacted People refers to any Dataverse table (such as a contact, lead, account or an insights profile) which is interacted with via an inbound or outbound channel such as email, SMS, form submission, etc. in a twelve-month period. Each interacted person is entitled to 10x interactions. A person is no longer counted towards the quota limits, if they have not been interacted within the past twelve months. The interaction can be sent through out-of-box channels available in Journeys (e.g., emails, SMS, push notifications) integrated with other Microsoft channels (e.g., ACS), or third-party systems integrated with Journeys (e.g., other SMS providers). People stored in Dataverse but not interacted with do not count towards quota. Interacted status remains for 12 months post-interaction.

Unified People - refers to a uniquely identified individual that is created through a collection of defined data source sets from multiple systems.

Dynamics 365 e-Commerce additional application overview

Entitlements for Dynamics 365 e-Commerce Tiers and overage SKUs

Average Order Value (AOV) is the total annual e-Commerce Gross Merchandise Value (GMV) across B2B and B2C through Dynamics 365, divided by the total number of e-Commerce transactions through Dynamics 365 across B2B and B2C.

Average Order Value (AOV) = Gross Merchandise Value (GMV)

Number of Orders

Gross Merchandise Value (GMV) is the total value of all transactions processed (including returns), excluding (a) any shipping, handling, and customs fees charged to end users; (b) any taxes customer collects from end users as part of any transaction; and (c) any financing charges and interest for installments charged to end users.

Transaction means any check out order processed by the Dynamics 365 e-Commerce. Any refund, return or chargeback, or any other reversal will not be counted as an additional transaction.

Tier		# of monthly transactions per SKU					
		BAND 1 AOV <\$50	BAND 2 AOV \$50-\$150	BAND 3 AOV \$150-\$500	BAND 4 AOV \$500-\$2K	BAND 5 AOV \$2K-\$5K	BAND 6 AOV \$5K+
Tier 1	\$4,000	4,700	2,400	1,100	480	275	200
Tier 1 overage	\$500	780	365	170	80	45	30
Tier 2	\$14,500	29,000	12,000	5,500	2,900	1,700	1,160
Tier 2 overage	\$500	1,250	540	230	125	75	50
Tier 3	\$31,000	86,000	38,750	15,500	8,600	5,065	3,400
Tier 3 overage	\$500	1,400	625	250	140	85	55

Scenario:

If a customer expects 9K transactions (B2B and B2C) per month (on average during the year) and \$400 average order value (based on annual e-Commerce revenue) they would purchase e-Commerce Tier 2 (Band 3) and 16 e-Commerce Tier 2 (Band 3) overage SKUs.

Dynamics 365 Commerce Scale Unit – Cloud Mapping Overview

Tip: Click the tabs below to jump to that section...

The below mapping explains the default Commerce Scale Unit – Cloud (CSU) entitlements based on number of device use rights. The mapping helps to predict how to buy Commerce Scale Unit – Clouds.

- Customers are entitled to default Commerce Scale Unit – Cloud (CSU) when buying licenses with device use rights.
- Default CSU can only be used to support device transactions.
- Default CSU entitlements are based on the total number of device use rights a customer has purchased.
- Commerce attach licenses do not count towards indicative device use rights.

Follow the two steps below to determine a customer's default Commerce Scale Unit – Cloud entitlements:

- **Step 1:** The number of device use rights are calculated based on license types and the number of these licenses that will be used with devices:
 - Operations - Device license = 1 indicative device use right
 - Operations - Activity license = 2/3 indicative device use right (Only count Operation – Activity licenses that will be used with devices)
 - Commerce base license = 2.5 indicative device use rights (Only count Commerce base licenses that will be used with devices)
 - NOTE: Commerce attach licenses do not count towards indicative device use rights
- **Step 2:** Default Commerce Scale Unit - cloud entitlements are based on below mapping:
 - If ≤ 65 indicative device use rights: 1 Basic CSU (a minimum of 50 device use rights is required for a default CSU)
 - If > 65 indicative device use rights: may stack default CSU entitlements based on the below mapping, but total CSU entitlements cannot exceed total use rights one has purchased
 - 1 Basic CSU per every 65 indicative device use rights
 - 1 Standard CSU per every 225 indicative device use rights
 - 1 Premium CSU per every 500 indicative device use rights

Example: If one has 1K indicative device use rights, they may choose to deploy 1 premium (500), 1 standard (225), and 4 basic CSUs (65×4), which maps to 985 device use rights (not exceed 1K). Alternatively, one may choose to deploy 2 premium CSUs (500×2).
