**Base license:** When purchasing multiple Dynamics 365 applications for a single user, the first application license must be the highest priced license (a.k.a. base license) for the named user. Every full-access user must have a base license.

**Attach license:** Dynamics 365 attach license pricing is available for users who require multiple Dynamics 365 applications. Attach licenses may only be assigned to users with an appropriate qualifying base license. A named user may have more than one attach license.

## Note:

- Base and attach licenses are **identical in their core capabilities** and are only differentiated in price.
- Attach licenses **do not include additional capacity entitlements**.<sup>1</sup>
- **Exception** - Business Premium base licensed users (\$100 user/month, billed annually) are eligible to add Customer Service Enterprise, Field Service, or Sales Enterprise at the \$20 user/month, billed annually attach pricing.

\* Additional capacity will be added to 10K Interacted People and 100K Unified People capacity included with Base or Attach license.

### Definitions:

**Interacted People** - Interacted People refers to any Dataverse table (such as a contact, lead, account or an insights profile) which is interacted with via an inbound or outbound channel such as email, SMS, form submission, etc. in a twelve-month period. Each interacted person is entitled to 10x interactions. A person is no longer counted towards the quota limits, if they have not been interacted within the past twelve months. The interaction can be sent through out-of-box channels available in Journeys (e.g., emails, SMS, push notifications) integrated with other Microsoft channels (e.g., ACS), or third-party systems integrated with Journeys (e.g., other SMS providers). People stored in Dataverse but not interacted with do not count towards quota. Interacted status remains for 12 months post-interaction.

**Unified People** - refers to a uniquely identified individual that is created through a collection of defined data source sets from multiple systems.

# Dynamics 365 e-Commerce additional application overview

## Entitlements for Dynamics 365 e-Commerce Tiers and overage SKUs

**Average Order Value (AOV)** is the total annual e-Commerce Gross Merchandise Value (GMV) across B2B and B2C through Dynamics 365, divided by the total number of e-Commerce transactions through Dynamics 365 across B2B and B2C.

Average Order Value (AOV) = Gross Merchandise Value (GMV)

Number of Orders

**Gross Merchandise Value (GMV)** is the total value of all transactions processed (including returns), excluding (a) any shipping, handling, and customs fees charged to end users; (b) any taxes customer collects from end users as part of any transaction; and (c) any financing charges and interest for installments charged to end users.

**Transaction** means any check out order processed by the Dynamics 365 e-Commerce. Any refund, return or chargeback, or any other reversal will not be counted as an additional transaction.

Tier		# of monthly transactions per SKU					
		BAND 1 AOV <\$50	BAND 2 AOV \$50-\$150	BAND 3 AOV \$150-\$500	BAND 4 AOV \$500-\$2K	BAND 5 AOV \$2K-\$5K	BAND 6 AOV \$5K+
Tier 1	\$4,000	4,700	2,400	1,100	480	275	200
Tier 1 overage	\$500	780	365	170	80	45	30
Tier 2	\$14,500	29,000	12,000	5,500	2,900	1,700	1,160
Tier 2 overage	\$500	1,250	540	230	125	75	50
Tier 3	\$31,000	86,000	38,750	15,500	8,600	5,065	3,400
Tier 3 overage	\$500	1,400	625	250	140	85	55

### Scenario:

If a customer expects 9K transactions (B2B and B2C) per month (on average during the year) and \$400 average order value (based on annual e-Commerce revenue) they would purchase e-Commerce Tier 2 (Band 3) and 16 e-Commerce Tier 2 (Band 3) overage SKUs.

# Dynamics 365 Commerce Scale Unit – Cloud Mapping Overview

Tip: Click the tabs below to jump to that section...

The below mapping explains the default Commerce Scale Unit – Cloud (CSU) entitlements based on number of device use rights. The mapping helps to predict how to buy Commerce Scale Unit – Clouds.

- Customers are entitled to default Commerce Scale Unit – Cloud (CSU) when buying licenses with device use rights.
- Default CSU can only be used to support device transactions.
- Default CSU entitlements are based on the total number of device use rights a customer has purchased.
- Commerce attach licenses do not count towards indicative device use rights.

**Follow the two steps below to determine a customer's default Commerce Scale Unit – Cloud entitlements:**

- **Step 1:** The number of device use rights are calculated based on license types and the number of these licenses that will be used with devices:
  - Operations - Device license = 1 indicative device use right
  - Operations - Activity license = 2/3 indicative device use right (Only count Operation – Activity licenses that will be used with devices)
  - Commerce base license = 2.5 indicative device use rights (Only count Commerce base licenses that will be used with devices)
  - NOTE: Commerce attach licenses do not count towards indicative device use rights
- **Step 2:** Default Commerce Scale Unit - cloud entitlements are based on below mapping:
  - If  $\leq 65$  indicative device use rights: 1 Basic CSU (a minimum of 50 device use rights is required for a default CSU)
  - If  $> 65$  indicative device use rights: may stack default CSU entitlements based on the below mapping, but total CSU entitlements cannot exceed total use rights one has purchased
    - 1 Basic CSU per every 65 indicative device use rights
    - 1 Standard CSU per every 225 indicative device use rights
    - 1 Premium CSU per every 500 indicative device use rights

*Example:* If one has 1K indicative device use rights, they may choose to deploy 1 premium (500), 1 standard (225), and 4 basic CSUs ( $65 \times 4$ ), which maps to 985 device use rights (not exceed 1K). Alternatively, one may choose to deploy 2 premium CSUs ( $500 \times 2$ ).
