Using This Guide

Use this guide to improve your understanding of how to license Microsoft Power Apps, Power Automate, Power Pages, and Power Platform add-ons.

To facilitate understanding of licensing requirements this guide is structured as follows:

- 1) How to buy
- 2) Product licensing
- 3) Additional resources
- 4) Change log

This guide does not supersede or replace any of the legal documentation covering use rights.

For help determining the right technology solution for any given organization, including the license requirements for a specific product or scenario, consult with your Microsoft account team or your [Microsoft Certified Partner](#).

All pricing is USD ERP and subject to change. All subscription pricing is listed per month, billed annually. Please see [Pricing | Microsoft Power Platform](#) for actual pricing.

For help determining the right technology solution for any given organization, including the license requirements for a specific product or scenario, consult with your Microsoft account team or a Microsoft Certified Partner. For more information on Power Platform products and program licensing visit the [Microsoft Central Licensing Hub](#).

What's new in this licensing guide

See the Change log [Appendix C](#), for minor changes effective May 2026.

Microsoft reserves the right to review or update this document at any time without notice. Users should take care to always use the latest version of the licensing guide for the most up-to-date information. The latest version of this guide can be found [here](#).

How to buy

There are three ways to buy Power Platform products and services.

- **Microsoft Partners**
For customers in need of a fully-managed and tailored Power Platform solution, [connect with a partner](#).
- **Microsoft Sales Online**
For customers who want to learn more about Power Platform products, explore use cases or receive pricing guidance, Microsoft Sales Online can provide direct assistance.
Contact [Microsoft Sales Online](#).
- **Microsoft Online**
Power Platform subscriptions are available [here](#).
Power Platform pay-as-you-go meters can be set up [here](#).

This table outlines three primary purchasing channels, all offering flexible subscription lengths and support models.

Overview of purchasing options

	Microsoft Partners	Microsoft Sales	Microsoft Online
Subscription length	Monthly / Annual / Multi-Year	Monthly / Annual / Multi-Year	Monthly / Annual / Multi-Year
Customer support	Industry specific	Account specific	Product specific
Eligibility	All customers	Managed accounts	All customers
Implementation	Customized support	Upon request	Independently managed
Scale	Department / Enterprise-wide	Enterprise-wide	Department / Enterprise-wide

[Learn more](#) about how to buy from Microsoft.

Product licensing

Power Platform licenses allow users to create and run apps, bots, flows, and custom websites across Power Apps, Power Automate and Power Pages. Any user or device that inputs data into queries, views data from or otherwise accesses these services directly or indirectly must be properly licensed. Power Apps, Power Automate, Power Pages and related products can be purchased through subscription licenses, subscription add-on licenses, and pay-as-you-go meters.

Power Platform subscription licenses

- Power Apps
 - Power Apps Premium
 - Power Automate Process Mining
 - Power Automate per user
- Power Automate
 - Power Automate Premium
 - Power Automate Process
 - Power Automate Hosted Process
 - Power Automate per flow
- Power Pages
 - Power Pages Authenticated users
 - Power Pages Anonymous users

Power Platform subscription add-on licenses

- Power Automate unattended RPA add-on
- Dataverse Database capacity add-on
- Dataverse File capacity add-on
- Dataverse Log capacity add-on
- Power Platform Requests add-on

Power Platform pay-as-you-go meters

- Power Apps per app meter
- Power Pages Authenticated users meter
- Power Pages Anonymous users meter
- Dataverse Database capacity meter
- Dataverse File capacity meter
- Dataverse Log capacity meter

Limited Power Platform use rights are included with select Dynamics 365, Microsoft/Office 365 and Windows licenses. Please refer to the summary of Power Apps, Power Automate and Power Pages tables for details and Appendix B for the lists of select licenses that include Power Platform capabilities.

Power Platform

For Power BI and Fabric licensing information, refer to the [Power BI Licensing Deck](#).
*Billed annually

Power Apps

Service Overview

Power Apps is a low code/no code application platform that allows enterprises to build, modernize, and deploy unlimited applications for teams, departments, or entire organizations and customize existing Dynamics 365 and Microsoft/Office 365 applications. For more details, please visit <https://powerapps.microsoft.com/>.

Licensing overview

General purpose, fully featured Power Apps capabilities are licensed via Power Apps subscriptions on a per user basis and via pay-as-you-go enabling licensed users to create, customize, share, and run business applications.

Additionally, limited Power Apps capabilities are included within select Dynamics 365 and Microsoft/Office 365 licenses. For more information, please see the sections titled *Power Apps use rights included with Dynamics 365 licenses* and *Power Apps Basic* later in this document.

A high-level overview of the licensing structure is provided below.

Power Apps Premium

Power Apps Premium is best for businesses that want one license for users, regardless of the number of apps they need to run. This offer enables licensed users to run **unlimited custom applications** and **access unlimited Power Pages websites**.

Power Apps Premium per user offer summary

SKU Name	Power Apps Premium
License type	Per user

Power Apps per app pay-as-you-go meter

The Power Apps per app meter enables individual users to run one custom application. This option is **best for businesses that want to pay-as-you-go** for only the users who access a Power App one more times in a month.

Power Apps per app pay-as-you-go offer summary

SKU Name	Power Apps Per App Active User-1
Meter name	Power Apps per app meter

Power Apps per app pay-as-you-go meter definition: A measure of the number of unique, active users who open a single pay-as-you-go enabled app in an environment one or more times in a month.

Power Apps use rights included with Dynamics 365 licenses

Limited Power Apps use rights are included within the same environment(s) as the licensed Dynamics 365 application(s) to allow users to customize and extend Dynamics 365 applications. Use of Power Apps capabilities included with Dynamics 365 licenses must be only within the context of and in the same environment as the licensed Dynamics 365 application. Use rights vary by Dynamics 365 license type.

Power Apps Basic

Power Apps Basic (limited Power apps use rights included with select Microsoft 365 and Office 365 licenses) allows users to customize and extend Microsoft 365 and Office 365 for productivity scenarios, and to deliver a comprehensive low-code extensibility platform for Microsoft Teams only. For a complete list of Microsoft 365 and Office 365 and licenses that include Power Apps and Dataverse for Teams use rights, please refer to [Appendix B](#).

Summary of Power Apps

		Power Apps subscriptions	Power Apps per app pay-as-you-go	Power Apps use rights included with:	Power Apps Basic
Capabilities	Entitlements	RECOMMENDED MOTION Power Apps Premium \$20 per user/month* (or \$12 per user/month with 2,000 + new per user licenses)*	Power Apps per app pay-as-you-go meter¹ \$10 per active user/app/month	Select Dynamics 365 licenses^{2,3}	Use rights with <u>select</u> Microsoft 365 and Office 365 licenses
Power Apps	Run custom apps	Unlimited apps	1 app	Within same environment as licensed Dynamics 365 application(s)	Unlimited
	Run custom websites	Unlimited websites			
	Run workflows within the custom app ⁴	● ³	● ³	● ³	●
AI in apps	Microsoft 365 Copilot	● ⁵			
	App skills	● ⁶			
Power Platform connectors	Standard connectors	●	●	●	●
	Premium and custom connectors	●	●	●	
	On premises and cloud services data transfer	●	●	●	
Dataverse	Full Dataverse access	●	●	●	Dataverse for Teams only
	Create and access custom tables ^{7,8}	●	●	Pro limited to 15 per app	
	Dataverse Database capacity (Accrued)	250 MB ⁹			
	Dataverse File capacity (Accrued)	2 GB ⁹			
Managed Environments	Administration and governance at scale	● ¹⁰	● ¹⁰	● ^{3,10}	

- ¹ Environments that are configured to use Power Platform pay-as-you-go, receive a one-time entitlement of 1 GB of Dataverse Database capacity and 1 GB of Dataverse File capacity per environment. Additional Dataverse Database, Dataverse File and Dataverse Log subscription capacity can be purchased in increments of 1 GB.
 - ² Dynamics 365 Pro does not have use rights for Power Apps or Power Pages.
 - ³ Within app context.
 - ⁴ Power Automate use rights included with Power Apps do not include RPA functionality, which requires a separate purchase of Power Automate Premium.
 - ⁵ Microsoft 365 Copilot provides in-app AI assistance and enables users to interact with Microsoft 365 Copilot declarative agents, custom engine agents, and Copilot Studio agents within Power Apps. In-app AI assistance and the use of Microsoft 365 Copilot agents require both a Power Apps Premium User SL and a [Microsoft 365 Copilot User SL](#). Copilot Studio agents can be customized by adding additional agent capabilities; use of these additional capabilities consumes [Copilot Credits](#).
 - ⁶ App skills include [Form filling](#), [Summaries](#), [Data exploration](#), and [Visualization](#). These capabilities require the Power Apps Premium User SL. Usage may be subject to service limits or throttling. Microsoft reserves the right to update the limits at any time without notice.
 - ⁷ For Power Apps use rights with restricted tables and exceptions for case tables, see [Restricted tables requiring Dynamics 365 licenses](#)
 - ⁸ For exceptions to Dynamics 365 Field Service use rights for Power Apps users, refer to the [Dynamics 365 Licensing Guide](#).
 - ⁹ Dataverse Database and Dataverse File capacity entitlements accrue at the tenant level. Additional Dataverse Database, Dataverse File and Dataverse Log subscription capacity can be purchased in increments of 1 GB via the Dataverse capacity add-ons.
 - ¹⁰ Please see [Managed Environments](#) for licensing details.
- *Billed annually

Power Automate

Service Overview

Power Automate allows enterprises to implement automated workflows and business processes and achieve operational efficiencies. For more details, please visit <https://powerautomate.microsoft.com/>.

Licensing overview

General purpose Power Automate capabilities are licensed via Power Automate subscription licenses. Additionally, limited Power Automate capabilities are also included within Power Apps, Dynamics 365, Microsoft/Office 365, and Windows licenses. For more information, please see the sections titled *Power Automate use rights included with Power Apps/Dynamics 365/Microsoft/Office 365 and Windows licenses* later in this document.

A high-level overview of the licensing structure is provided below.

Power Automate	Premium	Process	Hosted Process	Process Mining (PM)	Per user	Per flow (minimum 5 licenses)	Unattended RPA add-on
Licensing scheme	Per user/month ¹	Per bot/month ²	Per bot/month ²	100 GB of PM data capacity/month ³	Per user/month ¹	Per flow/month ²	Per bot/month ²
Description	Enables licensed users to automate modern applications via API-based Digital Process Automation (cloud flows) and legacy applications via UI-based Robotic Process Automation (desktop flows) in attended mode	Licenses an autonomous bot that runs unattended Robotic Process Automation, or a core business process (e.g., invoice processing or HR onboarding) that can be accessed org-wide without licensing individual users	Superset of Power Automate Process, providing the same functionality but with the addition of a Microsoft hosted machine capacity that enables Robotic Process Automation with zero infrastructure	Capacity based license that enables rapid ROI for customers by identifying critical optimization opportunities and improving existing processes. Add-on to Power Automate Premium	Best for businesses that want to license individual users to create unlimited cloud flows	Best for businesses that want to implement flows with reserved capacity for unlimited users across an organization	Add-on to Power Automate Premium or Power Automate per flow that enables a bot to run autonomously on a local remote desktop or virtualized environment

¹ Per tenant/month, one license allows user or capacity to use in any environment in the tenant.

² Per environment/month, one license allows the bot or process to be used in a single environment. An additional license is required if the same bot or process is deployed in a different environment.

³ Per 100 GB of PM data stored per tenant/month, capacity-based license/tenant.

Power Automate Premium

Power Automate Premium spans modern and legacy applications enabling licensed users to create and run unlimited cloud flows using Digital Process Automation (DPA), plus automate legacy applications with desktop flows through Robotic Process Automation (RPA) in attended mode. This offer includes full Process Mining desktop functionality and a limited amount of Process Mining data capacity (50 MB that can be pooled to a max of 100 GB per tenant).

Please note running an RPA bot in an unattended scenario requires the addition of the Power Automate Hosted Process license.

Power Automate Premium offer summary

SKU Name	Power Automate Premium
License Type	Per user*
Cloud Flows ¹ (Automated, instant, scheduled, and business process flows)	Unlimited
Desktop flows (with attended RPA bots) ²	1 bot
Included Process Mining data storage	50 MB per user license, up to 100 GB per tenant

¹Unlimited flows within service limits. See [technical documentation](#) for definitions of each flow type.

²Multiple desktop flows may be authored/recorded for the RPA bot to execute. However, a bot can only execute one discrete desktop flow (i.e., process) at a time. Multiple processes must be serialized to run sequentially.

*Per tenant/month, one license allows user or capacity to use in any environment in the tenant.

Note: Desktop flow authoring, bot orchestration and management are included in this offer.

Power Automate Process

The Power Automate Process license can be used to license a single autonomous bot that can be used for unattended robotic process automation (unattended RPA), independent of a user, or a critical business process that can be accessed org-wide without licensing individual users.

When licensing bots for unattended automation:

- Concurrent instances of a singular process require an additional unattended bot for each instance.
- Unattended bots can be deployed on a local, remote desktop, or other virtualized environment. This license does not include any of these resources. The Power Automate Hosted Process license includes all the value of the Power Automate Process license with a virtual machine hosted and managed by Microsoft

When licensing business processes (e.g., invoice processing or HR onboarding):

- Every top-level flow needs to be licensed individually. 'Child flows' triggered by another flow do not need to be additionally licensed.
- Scheduled flows may be configured to trigger every minute, irrespective of license type. There are no limits on the frequency of flow runs beyond what a connector supports.

Power Automate Process offer summary

SKU Name	Power Automate Process
License Type	Per bot*
Minimum initial purchase	None

*Per environment/month, one license allows the bot or process to be used in a single environment.

An additional license is required if the same bot or process is deployed in a different environment.

Power Automate Hosted Process

Licensed per bot, Power Automate Hosted Process is a superset of Power Automate Process, providing the same functionality, but also includes a virtual machine for running unattended automation with zero infrastructure. Each Hosted Process license provides capacity for a single Microsoft hosted machine.

Power Automate Hosted Process offer summary

SKU Name	Power Automate Hosted Process
License Type	Per bot*
Additional licensing may be required	Any software automated with an unattended bot may require additional licensing. For example, unattended RPA scenarios incorporating M/O365 require the Microsoft 365 - Unattended License. Please see the Product Terms for more information.

*Per environment/month, one license allows the bot or process to be used in a single environment. An additional license is required if the same bot or process is deployed in a different environment.

- One Hosted Process license includes the capacity for one Microsoft hosted machine and an unattended RPA bot. All desktop flows (RPA) running on the machine and cloud flows (DPA) that are part of the business process are also covered by the license.
- One Hosted Process license can also be used as a Process license to run unattended automation on a customer managed machine.
- Any services or applications the unattended bot accesses must be licensed separately. For instance, if the bot is accessing Windows or Office, the Microsoft 365 – Unattended License must also be purchased in addition to the Power Automate Hosted Process license.

Note: Hosted Process licenses the machine and not the user. The Power Automate Premium user license is required to run attended RPA, and for RPA developers to build and manage desktop flows on the Power Automate portal. To learn more about the Premium RPA features that come with the Premium user license, go to [Premium RPA features](#).

Power Automate Process Mining

Process Mining is a capacity-based, add-on license that enables rapid ROI for customers by identifying critical optimization opportunities and improving existing processes. There are no limits to the number of users per tenant.

Capacity should be purchased for peak utilization over a 12-month contract period. If customers experience monthly or seasonal spikes, they must purchase enough capacity to allow for this high "watermark" when estimating the amount of capacity needed per month.

Process Mining add-on offer summary

SKU Name	Power Automate Process Mining
License Type	Per 100 GB of data stored /month*
Qualifying base license	Power Automate Premium
Capacity per license	100 GB of data stored/month

*Per 100 GB of data stored per tenant/month, capacity-based license/tenant.

Power Automate per user

Power Automate per user equips individual users to create and run **unlimited** workflows and business processes based on their unique needs. The per user license is intended to support the broad adoption of an automation culture in an organization. Should the entire organization be licensed with the Power Automate per user, admins will have minimal overhead with tracking how many flows are being activated and used within the organization.

Power Automate per user offer summary

SKU Name	Power Automate per user
License Type	Per user*
Enabled flows	Unlimited

* Per tenant/month, one license allows user or capacity to use in any environment in the tenant.

Power Automate per flow

Power Automate per flow is licensed by top-level flow and allows customers to implement critical business processes with capacity that serves teams, departments, or the entire organization without individually licensing each end user that triggers the licensed flow.

Power Automate per flow offer summary

SKU Name	Power Automate per flow
License Type	Per flow*
Minimum initial purchase	5 units

*Per environment/month, one license allows the bot or process to be used in a single environment. An additional license is required if the same bot or process is deployed in a different environment.

- All **top-level flows** need to be licensed individually (scheduled flows, automated flows, instant flows, and business process flows). Flows that are only used as “child” flows (triggered by another flow) do not need to be additionally licensed.
- Customers wishing to license more top-level flows, should purchase more units of the “Power Automate per flow.”

Note: scheduled flows may be configured to trigger every minute, irrespective of license type. There are no limits on the frequency of flow runs beyond what the connector supports.

Power Automate unattended RPA add-on

The Power Automate unattended RPA add-on extends desktop-based automation by enabling a bot to run autonomously, i.e., independent of a user. Unattended bots can be deployed on a local, remote desktop, or other virtualized environment. Power Automate Premium or Power Automate per flow qualify as base licenses for the unattended RPA add-on. Multiple unattended RPA add-on licenses can be added with a single qualifying base license.

The Power Automate unattended RPA add-on is licensed by bot. Concurrent instances of a singular process require an additional unattended bot for each instance.

Power Automate Unattended RPA add-on offer summary

SKU Name	Power Automate unattended RPA add-on
License Type	Per bot*
Qualifying base licenses	Power Automate Premium, Power Automate per flow
Additional licensing may be required	Any software automated with an unattended bot may require additional licensing. For example, unattended RPA scenarios incorporating M/O365 require the Microsoft 365 - Unattended License. Please see the Product Terms for more information.

*Per environment/month, one license allows the bot or process to be used in a single environment. An additional license is required if the same bot or process is deployed in a different environment.

- One unattended RPA add-on license includes the rights to one unattended RPA bot, as well as all necessary functions tied to desktop flow authoring, bot orchestration and management.
- Running the unattended RPA bot in a VM requires the separate purchase of any necessary compute resources.

Power Automate use rights included with Power Apps licenses

Power Apps Premium and Power Apps pay-as-you-go licenses include Power Automate use rights for the purpose of automating workflows associated with Power Apps applications. Power Automate use within Power Apps is limited to the context of the Power Apps application. What this means is that for both triggers and actions, a flow included within a Power Apps application connect to:

- Any data source within the use rights of the Power Apps application.
- Directly with the Power Apps application (via built in trigger/action).

If the flow is isolated and has nothing to do with the Power Apps application, then a full Power Automate license will need to be purchased.

Example of Power Automate use within Power Apps application context

A user with a full Power Apps license runs an app that uses a SQL Server database as the data source and includes flows that:

- Read from OR write to the SQL Server database.
- Use a built-in Power Apps trigger and/or action – e.g., sends a push notification to the app.

Example of Power Automate use outside of Power Apps application context

The same user (in the example above) now also wants to use a flow that updates an Oracle database, that:

- Is completely unrelated to the Power Apps app.
- Does not interact in any way with the Power Apps app (or its data sources).

This user will then require a full Power Automate license.

Power Automate use rights included with Dynamics 365 licenses

Dynamics 365 licenses include Power Automate use rights for the purpose of customizing and extending Dynamics 365 applications. Power Automate use within Dynamics 365 is limited to the context of the embedding Dynamics 365 application. For both triggers and actions, flows included within the Dynamics 365 application can connect:

- To any data source within the use rights of the Dynamics 365 application
- Directly with the Dynamics 365 application (via built in trigger/action)

If the embedded flow is not within the context of the Dynamics 365 application, then full Power Automate licenses will need to be purchased.

Power Automate Basic

Power Automate Basic (Power Automate use rights included with select Microsoft 365/Office 365 licenses) allows users to customize and extend Microsoft 365/Office 365 for productivity scenarios, and to deliver a comprehensive low-code extensibility platform for Microsoft Teams only. For a complete list Microsoft 365/Office 365 licenses that include Power Automate and Dataverse for Teams use rights, please refer to [Appendix B](#).

Power Automate use rights included with Windows licenses

Limited Power Automate use rights are included with select Windows licenses to create and execute personal desktop automation for attended RPA capabilities in Power Automate Desktop. This expands the digital workforce's ability to automate legacy tasks that can slow down workflows, empowering Windows users to start automating redundant and time-consuming tasks with low-code automation through RPA. For a complete list of Windows licenses that include these use rights, please refer to [Appendix B](#).

Power Automate use within Windows is available for all applications and websites (across all web browsers). Enterprise automation and administrative rights are not available in Windows.

Summary of Power Automate

		Power Automate subscription	Power Automate subscription	Power Automate subscription	Power Automate subscription	Power Automate subscription	Power Automate subscription	Power Automate subscription	Use rights with	Use rights with	Use rights with	Use rights with	Power Automate Basic

¹. Per tenant/month, one license allows user or capacity to use in any environment in the tenant.

². Per environment/month, one license allows the bot or process to be used in a single environment. An additional license is required if the same bot or process is deployed in a different environment.

³. Process Mining qualifying prerequisite: Power Automate Premium. Multiple add-ons can be applied against a single qualifying prerequisite license.

⁴. Per 100 GB of PM data stored per tenant/month, capacity-based license/tenant.

⁵. Qualifying prerequisites for the Unattended RPA add-on: Power Automate Premium and Power Automate per flow. Multiple add-ons can be applied against a single qualifying prerequisite license.

⁶. See [technical documentation](#) for definitions of each flow type.

⁷. Within app context. For both triggers and actions, flows within an embedding app, can connect to any data source within the use rights of the embedding application and directly with the embedding application.

⁸. Cloud flow usage of up to 250,000 Power Platform Requests per day at the tenant level is included as part of the Copilot Studio message pack subscription. Cloud flows do not consume Copilot Studio message capacity.

⁹. Via [Power Automate desktop](#) only; a free application not for business-critical functions, with no SLA or Microsoft support. cloud flows, standard/premium connectors, orchestration (scheduled or automatic triggers for desktop flows, attended or unattended, combine cloud flows + desktop flows in a single automation), sharing desktop flows, developing in a different environment than the default, Automation Lifecycle Management (ALM), monitoring, execution logs are not included.

¹⁰. The Power Automate Premium license includes the Process Mining desktop app with advanced analytics and optional Power BI customization with a separate purchase of Power BI. Process Advisor that comes with Power Automate Premium licenses includes out of the box process mining capabilities (pre-built templates) with very limited customization.

¹¹. 50 MB of Process Mining data storage per user license, cap on accrued capacity: 100 GB per tenant.

¹². Desktop flow connector is included. (This desktop flow connector is not included in Windows licenses.)

¹³. Dataverse Database and File subscription capacity is pooled at the tenant level. Additional Dataverse Database, Dataverse File and Dataverse Log subscription capacity can be purchased in increments of 1 GB.

¹⁴. Please see [Managed Environments](#) for licensing details.

*Billed annually

Power Pages

Service Overview

Power Pages delivers a secure, enterprise-grade platform for creating, hosting, and administering modern external-facing business websites. For more details, please visit <https://powerpages.microsoft.com/>

Licensing overview

Power Pages licensing is based on two user types, authenticated users per website/month and anonymous users per website/month. Sufficient user capacity must be assigned to the environment to cover the total number of unique users who access the website/month.

- **Authenticated users definition:** Power Pages authenticated users are users who obtain secure access to a website by logging in through an authentication provider on the website.
- **Anonymous users definition:** Power Pages anonymous users are users who access a website and do not log in.

Power Pages

All Power Pages licenses include the full capabilities of Power Pages. Organizations that need full-fledged general purpose Power Pages websites to create, host and administer rich, interactive, data first, business web apps worldwide should purchase Power Pages capacity packs.

Power Pages Authenticated user subscription

Authenticated user subscription licenses are offered for the number of unique, authenticated users accessing a website. These licenses are offered through capacity packs with 100 users per capacity pack. Three tiers of pricing are offered. Once the minimum purchase requirement is met, additional packs can be purchased in units of one.

Power Pages Authenticated user capacity packs

Capacity Pack Tiers	Capacity Packs Minimum purchase	Total Number of users (1 capacity pack = 100 users)	Pricing
Tier 1	1 capacity pack	100+ users	\$200/pack
Tier 2	100 capacity packs	10,000+ users	\$75/pack
Tier 3	1,000 capacity packs	100,000+ users	\$50/pack

Customers should purchase the necessary number of capacity pack licenses to cover the anticipated number of authenticated users that will access each Power Pages website over a monthly period. Unused capacity does not carry over to the next month. Note: Authenticated user capacity needs to be assigned to an environment.

Power Pages per Authenticated User offer summary

Power Pages Authenticated Users	Offer Summary
SKU Name	Power Pages Authenticated users per site
License type	Per authenticated user/website

Power Pages Anonymous user subscription

Anonymous user subscription licenses are offered for the number of anonymous users who access a website and do not log in. These licenses are offered through capacity packs with 500 users per capacity

pack. Three tiers of pricing are offered. Once the minimum purchase requirement is met, additional packs can be purchased in units of 1.

Power Pages Anonymous user capacity packs

Capacity Pack Tiers	Capacity Packs Minimum purchase	Number of users (1 capacity pack = 500 users)	Pricing*
Tier 1	1 capacity pack	500+ users	\$75/pack
Tier 2	20 capacity packs	10,000+ users	\$37.50/pack
Tier 3	200 capacity packs	100,000+ users	\$25/pack

*Billed annually

Customers should purchase the necessary number of capacity pack licenses to cover the anticipated number of anonymous users that will access each Power Pages website over a monthly period. Unused capacity does not carry over to the next month. Note: Anonymous user capacity packs do not need to be assigned to individual users. These capacities are assigned to an environment.

Power Pages per Anonymous user offer summary

Power Pages Anonymous Users	Offer Summary
SKU Name	Power Pages Anonymous users per site
License Type	Per anonymous user/website

Power Pages pay-as-you-go meters

With the Power Pages pay-as-you-go meters, customers can post-pay based on the actual number of Authenticated and/or Anonymous users who have accessed a website.

Please note: Power Pages subscription licenses cannot be used in a pay-as-you-go environment.

Power Pages Authenticated user meter

The Authenticated user pay-as-you-go meter enables customers to pay-as-you-go based on the actual number of authenticated users who have accessed a website in a month.

Power Pages Authenticated pay-as-you-go meter definition: A measure of the number of unique authenticated users per website per month.

Power Pages Anonymous user meter

The Anonymous user pay-as-you-go meter enables customers to pay-as-you-go based on the actual number of Anonymous users who have accessed a website in a month.

Power Pages Anonymous pay-as-you-go meter definition: A measure of the number of unique anonymous users per website per month.

Power Pages pay-as-you-go offers summary

SKU Name	Power Pages Authenticated User
Meter name	Authenticated Users per Site Active User
SKU Name	Power Pages Anonymous User
Meter name	Anonymous Users per Site Active User

Power Pages use rights included with Power Apps and Dynamics 365 licenses

Power Pages use rights within Power Apps and Dynamics 365 Enterprise Apps are limited to the same environment as the Power Apps and Dynamics Enterprise Apps. Dynamics 365 Enterprise Apps are granted use rights for Power Pages, however, restricted tables and the associated Dynamics 365 license

requirements for users who create, update, or delete data stored within these tables remain in place. For a full list of restricted tables, see [Restricted tables requiring Dynamics 365 licenses](#).

License	Power Pages use rights
Power Apps Premium	Unlimited Power Apps and Power Pages websites
Dynamics 365 Team Members	None
Dynamics 365 Operations – Activity	None
Dynamics 365 Apps ¹	None
Dynamics 365 Enterprise and Premium Apps ²	<ul style="list-style-type: none"> Power Pages websites that map to the same environment as the licensed Dynamics 365 application Unlimited Power Pages websites

¹ Environments that are configured to use Power Platform pay-as-you-go, receive a one-time entitlement of 1 GB of Dataverse Database capacity and 1 GB of Dataverse File capacity per environment. Additional Dataverse Database, Dataverse File and Dataverse Log subscription capacity can be purchased in increments of 1 GB.

² For Power Pages use rights with restricted tables and exceptions for case tables, see Restricted tables requiring Dynamics 365 licenses.

³ Per capacity pack

⁴ Per license capacity

⁵ Please see Managed Environments for licensing details.

Dataverse

Microsoft Dataverse is a secure, scalable, and cloud-based data platform that enables users to store, manage, and model business data used in applications across the Microsoft ecosystem. It is the foundational data layer for Power Platform, including Power Apps, Power Automate, Power Pages, Copilot Studio and Power BI. It also underlies select Dynamics 365 applications.

Dataverse capacity types and purposes

Dataverse	Purposes
Database	Stores and manages table definitions and data
File	Stores attachments to notes or emails in Dynamics 365 Sales, Customer Service, and Field Service applications and Power Apps. These include documents, image files, videos, PDF files and other crucial files needed in an organization.
Log	Records table and column data changes over time for use in analysis and reporting purposes. Log capacity is designed to help organizations meet their auditing, compliance, and governance policies.

Dataverse allows integration with Outlook and SharePoint.

Dataverse default and accrued subscription capacity entitlements

Every tenant with a Power Apps, Power Automate, Power Pages or Copilot Studio license receives default capacity. In addition, for each Power Apps, Power Automate, Power and Power Pages license there is additional accrued capacity added to the tenant. See tables below for details. For Dataverse for Teams capacity and service limits, please refer to the documentation [here](#).

Power Apps Premium capacity per tenant	Default Premium	Accrued Premium
Dataverse Database	20 GB	250 MB
Dataverse File	20 GB	2 GB
Dataverse Log	2 GB	

Power Automate Default capacity per tenant	Default Premium	Default Per user	Default Process	Default Hosted Process	Default Per flow
Dataverse Database	20 GB	20 GB	20 GB	5 GB	15 GB
Dataverse File	20 GB	20 GB	2 GB	2 GB	2 GB
Dataverse Log	2 GB	2 GB	200 MB	200 MB	200 MB

Power Automate Accrued capacity per tenant	Accrued Premium	Accrued Per user	Accrued Process	Accrued Hosted Process	Accrued Per flow	Accrued Process Mining
Dataverse Database	250 MB	250 MB	50 MB	50 MB	50 MB	2 GB
Dataverse File	2 GB	2 GB	200 MB	200 MB	200 MB	1 TB
Dataverse Log						

Note, customers may have as many flows as needed with Power Automate Process and Power Automate per flow. Each flow will increase capacity limits.

Power Pages capacity per tenant	(Authenticated) Default per tenant	(Anonymous) Default per tenant	Accrued per Authenticated user capacity pack	Accrued per Anonymous user capacity pack
Dataverse Database	15 GB	15 GB	2 GB	500 MB
Dataverse File			16 GB	4 GB
Dataverse Log	2 GB	2 GB	1 GB	250 MB

Power Apps, Power Automate, Copilot Studio, Power Pages and Dynamics 365 applications leverage the same tenant and infrastructure. Dataverse Database, Dataverse File, and Dataverse Log capacity is accrued across the tenant and shared amongst relevant application workloads.

There are additional Microsoft subscriptions beyond Power Platform that grant Dataverse capacity entitlements. Please see [this page](#) for details related to Project for the web, and the [Dynamics 365 Licensing Guide](#) for information related Dynamics 365 entitlements.

The first Power Apps, Power Automate, Power Pages, Copilot Studio or [select](#) Dynamics 365 subscription provides the one-time default capacity entitlement for the tenant. For example, if a new customer purchases Power Apps Premium, the tenant will receive 10 GB of default Dataverse Database capacity. Additional subscriptions do not add to the tenant’s default capacity.

When additional subscriptions are added to the tenant, additional Dataverse capacity may accrue to the tenant.

Example: Assume that a new customer purchases 10 Power Apps Premium licenses and 20 Power Automate Premium licenses. The total tenant wide pooled capacity will be as follows:

Default and Accrued Capacity Allocation	Default/tenant	Accrued/10 Enterprise USL	Total Tenant wide capacity
Dataverse Database Capacity	10 GB	10*250 MB + 20*250 MB =7.5 GB	10 GB + 7.5 GB = 17.5 GB
Dataverse File Capacity	20 GB	10*2 GB + 20*2 GB = 60 GB	20 GB+60 GB = 80 GB
Dataverse Log Capacity	2 GB	NA	2 GB

Dataverse capacity add-ons

Apps, flows, bots or websites utilizing Dataverse will consume varying quantities of Database capacity, File capacity, and Log capacity. Additional capacity is available through the Dataverse capacity add-ons.

Subscription Capacity/tenant	Additional Increment	Minimum Quantity	Pricing*
Dataverse Database capacity add-on	1 GB	1	\$40/month
Dataverse Database capacity Tier 2 add-on	1 GB	1,000	\$30/month
Dataverse File capacity add-on	1 GB	1	\$2/month
Dataverse Log capacity add-on	1 GB	1	\$10/month

*Billed annually

Please note that Dataverse capacity add-ons do not apply to Dataverse for Teams scenarios (i.e., when a Dataverse for Teams environment reaches its limit, customers need to step up to full Power Apps, Power Automate, Power Pages or Copilot Studio licenses for additional capacity).

Dataverse default capacity for Power Platform pay-as-you-go environments

Dataverse default capacity

Environments configured to use Power Platform pay-as-you-go, receive a one-time entitlement of 1 GB of Dataverse Database and 1 GB of Dataverse File capacity per environment. These entitlements do not change based on the number of users using apps or custom websites in an environment. These pay-as-you-go environments do not consume tenant-wide Dataverse capacity. More information available [here](#).

Pay-as-you-go environments	Included per pay-as-you-go environment
Dataverse Database capacity	1 GB
Dataverse File capacity	1 GB
Dataverse Log capacity	N/A

Dataverse capacity meters

With a pay-as-you-go enabled environment, Dataverse capacity meters can be used to [pay-as-you-go](#) for Dataverse usage as alternatives to the existing subscription capacity add-ons for overages. Dataverse pay-as-you-go capacity is billed based on the amount of capacity used in the environment, beyond the 1 GB Dataverse Database capacity and 1 GB Dataverse File capacity entitlements per environment. No capacity is allocated for Dataverse Logs. (Fractional usage is calculated to 2 decimal places in local currencies.)

Meter definition: Amount of capacity used in the environment beyond any entitled amounts (1 GB database capacity and 1 GB of file capacity per environment).

Dataverse Capacity/environment	Additional Increment	Pricing
Dataverse Database capacity	1 GB	\$48/month
Dataverse File capacity	1 GB	\$2.40/month
Dataverse Log capacity	1 GB	\$12/month

Dataverse Model Context Protocol (MCP) server

The Dataverse MCP server provides a standardized and secure way to make Dataverse capabilities to MCP clients such as Copilot Studio. When configured for a specific environment, Dataverse acts as an MCP server by offering tools and contextual resources that allow agents running in these clients to query, manage and interact with Dataverse tables and records in accordance with Dataverse security, licensing and governance policies.

When Dataverse MCP tools are utilized within Copilot Studio, there is no separate usage fee for MCP tool execution when access is covered by a valid license. Standard orchestration charges for such agents or tool calls continue to apply in accordance with published [billing rates](#).

Access to Dataverse

MCP tools by MCP clients other than Copilot Studio requires a valid license for authentication and access to the MCP server, as detailed below:

- **Access to non-D365 data** is included with the Microsoft 365 Copilot USL.
- **Access to Dynamics 365 data** is included with a D365 Premium license (Sales Premium, Finance Premium, Supply Chain Premium, and Customer Service Premium).
- **Access with other applicable licenses** will be billed at:
 - MCP tools are billed at the same rate as AI tools (basic), per [Copilot Credit consumption rates](#).
 - Dataverse grounding resource calls (e.g., Search and Fetch tool calls) are billed at the same rate as tenant graph grounding, per published [billing rates](#)
- Customers are responsible for configuration and covering the orchestration costs associated with other platforms (e.g., Microsoft Foundry, Anthropic Claude).

For a detailed list of Dataverse MCP tools, please see [Dataverse MCP tools](#).

Dataverse built-in disaster recovery

Microsoft provides business continuity and disaster recovery capabilities to production environments in Power Platform and Dynamics 365 software as a service, without requiring manual intervention. Production environments are replicated across multiple [availability zones](#) within an [Azure region](#), and automated failover is performed to another zone within the same region if an outage is detected.

Dataverse self-service disaster recovery

Customers that require greater distance within a geography can choose to use self-service disaster recovery. This allows customers to replicate their [Managed Environments](#) across *far distances* and initiate environment failover between regions in a self-serve manner. Environments, with disaster recovery activated, replicate all data between two regions and can fail over between them.

To use self-serve disaster recovery for an environment, it must be linked to a pay-as-you-go [billing plan](#). Replicated data of different storage types, e.g., Database, Log, and File, is added to the Dataverse capacity consumed, billed at the same rate as the primary storage.

Managed Environments

Managed Environments is included with the following subscription licenses and pay-as-you-go meters.

- Power Apps and Power Automate standalone¹ User Subscription Licenses (USLs)
- Power Pages user subscription capacity packs
- Copilot Studio tenant license
- Copilot Studio for Microsoft 365 Copilot license (only for features related to Copilot Studio)
- Dynamics 365 Premium, Enterprise, Team Members standalone licenses and Dynamics 365 Customer Insights tenant license.
- Power Apps per app, Power Pages and Copilot Studio pay-as-you-go meters²

Once enabled, all active usage in the environment will require one of these standalone licenses or pay-as-you-go meters. Please review [Power Platform Managed Environments](#) for details.

¹ "Standalone licenses" refers to full Power Apps, Power Automate, Power Pages and Copilot Studio licenses and does not include the limited Power Apps, Power Automate and Power Pages use rights that come with select Dynamics 365 and Microsoft 365 licenses.

² The Power Apps per app pay-as-you-go meter satisfies the prerequisite that all active Power Apps usage in the environment requires standalone licenses or meters. However, this meter covers Power Apps usage only; any Power Automate flow usage must be covered by standalone Power Automate licenses.

Additional Resources

Multiplexing

Microsoft's Multiplexing rules protect against customers looking for ways to purchase fewer licenses than would otherwise be required to access a software or service. "Multiplexing" refers to the use of hardware or software to pool connections, reroute or indirectly access information, and/or reduce the number of devices or users that directly access or use a product. The most common form of Multiplexing is often thought of as "connection pooling" where many users are accessing an application through a single contact point. As technology in the world has advanced, there are many other forms of Multiplexing that have emerged, such as automated processes to migrate data, accessing applications indirectly, and more.

Multiplexing does not reduce the number of subscription licenses of any type required to access the Power Platform services. Any user or device that inputs data into, queries, views data from or otherwise accesses Power Apps, Power Automate and Power Pages apps, directly or indirectly must be properly licensed. The number of tiers of hardware or software between Power Platform apps and the users or devices that ultimately use Power Platform indirectly does not affect the number of User SLs required. For additional information about multiplexing refer to the [Microsoft Multiplexing Overview](#).

Licensing Requirements for External Users

External users must be appropriately licensed to access Power Platform services and data. External Users means users that are not (a) employees of Customer or its Affiliates, (b) contractors or agents that typically work for Customer or its Affiliates for more than 30 hours on average per week, or (c) contractors or agents that typically work onsite for Customer or its Affiliates on each working day.

Applicable licensing includes:

- An appropriate Power Platform User SL
- Power Pages Authenticated or Anonymous users/website capacity licenses
- Accessing via Power Automate per flow or Power Automate Process licenses
- Limited capabilities included with Dynamics 365, Microsoft/Office 365, or Windows licenses (See summary of Power Apps, Power Automate, Copilot Studio and Power Pages tables in this guide for details.)

Users must be appropriately licensed whether they are accessing directly or indirectly per multiplexing guidelines. Information on external guest user access is available [here](#).

Trials and Implementation

Sign-up for a free trial of

- [Power Pages](#)

Power Platform Service Support

Support Plans

The benefits included in the [Subscription Support Plan](#) are applicable for customers who license Power Platform solutions via MOSP, EA, MPSA, EAS, and EES. Learn more about Power Apps, Power Automate, Power Pages, and Dynamics 365 support [options](#):

- [Professional Direct Support for Dynamics 365 and Power Platform](#)
- [Unified Support](#) (for enterprise solutions)

SKU Name	Description	Price/month*	Licensed
Professional Direct Support for Dynamics 365 and Power Platform	ProDirect Support Subs Per User for Power Platform and D365	\$9	User

Customer must acquire enough Professional Direct Support licenses to cover each Power Platform and Dynamics 365 license on its agreement, up to a maximum of 250 licenses.

*Billed annually

Appendix A: Terminology

Administration: Administration is critical in order to establish boundaries and policies around the use of Power Apps in organizations.

- Manage environments – space to store, and manage, and share data, apps, and flows
- Data policies – create and enforce policies that define how data can be shared

Application Program Interface (API): Any form of application programming interface that provides access to a Microsoft service and any associated tools, including sample code that enables interactions with Microsoft's services, and documentation that Microsoft makes available under these TOU, and includes all elements, components, and executables of such API.

Connector: It provides a way for users to connect their business data and leverage a set of pre-built actions and triggers to build their applications and workflows. Examples of connections: Dataverse (formerly Common Data Service), SharePoint, SQL, OneDrive, Excel, Dynamics 365.

- **Standard Connector:** Data sources within the Microsoft 365 ecosystem. Examples: Excel, Outlook, SharePoint, LinkedIn. A list of standard connectors is located [here](#).
- **Premium Connector:** Business systems beyond Microsoft 365. Examples: DocuSign, Zendesk, Jira Software.
- **Custom Connector:** To support more tailored scenarios, users can build custom connectors with their own triggers and actions. These connectors are function-based; data is returned based on calling specific functions in the underlying service. **Example:** Services that are not available as prebuilt connectors.
- **On-premises Connector:** Accesses on-premises data using a gateway. **Example:** Microsoft SQL Server.

CRUD: Create, read, update, and delete operations.

Dataverse (formerly Common Data Service): Desktop flow: A feature in Power Automate targeting the RPA market by enabling legacy apps to be automated via GUI vs API.

Processes executed via desktop flows can be contained within a broader API-based automation scenario or exist standalone.

Flow (definition of flow within app context): For both triggers and actions, flows included within an embedding application can connect:

- To any data source within the use rights of the embedding application
- Directly with the embedding application (via built in trigger/action)

Robotic Process Automation (RPA): A market for process automation that encompasses the use of an application's graphical user interface (GUI), where a user records a series of steps/actions/tasks for the automation technology to then perform as a process by repeating directly in the GUI.

RPA robot or "bot": A GUI-based process running on a desktop or virtualized environment.

- **Attended bot:** Triggered by an explicit user action on their workstation, i.e., a local or remote desktop
 - Must operate concurrently with the user on the same workstation
 - Can run more than one discrete process, but each process must be serialized to run sequentially
- **Unattended bot:** Runs autonomously without requiring user actuation
 - Can be deployed on a local or remote desktop, or other virtualized environment
 - Can run more than one discrete process, but each process must be serialized to run sequentially
 - Concurrent instances of a singular process require an additional unattended bot for each instance.

Tables:

- **Standard tables:** Dataverse provides business tables, out of the box, which represent most commonly used tables across business applications.
- **Custom tables:** Tables that are created by the customer/partner for a specific business need.
- **Restricted tables:** Tables that requires a Dynamics 365 license for full access. Examples: Case, SAL, Knowledge Articles. For list of restricted tables click [here](#).

Workflows:

- **Background workflows:** Task automation across systems and services. Runs in the background.
- **Real-time workflows:** Task automation across systems and services. Runs in a real time manner.
- **Business process flows:** Structured stateful human interactive workflows which are composed of multiple steps, allows branching/stage gating, and includes process KPIs and reporting.

Appendix B: Dynamics 365, Microsoft/Office 365, and Windows licenses that include Power Platform capabilities
