Enterprise Agreement Introduction

The Microsoft® Enterprise Agreement offers simplicity in today's complex software environment. Designed for organizations that implement enterprise-wide standards to enhance productivity, the Enterprise Agreement provides a framework for making software license acquisitions and management easier for organizations with as few as 250 desktop PCs.

Enterprise Agreement Overview

If your organization has a minimum of 250 desktops and you want to license 100 percent of your qualified desktops for a three-year period, you can initiate an Enterprise Agreement. The Enterprise Agreement offers:

- Software Assurance; a powerful combination of benefits that include new version rights, the Home Use Program, and many other advantages, including support, tools, and training. Your organization can gain the flexibility it needs to help keep your business edge.
- Volume pricing and the rights to the latest Microsoft enterprise software products, including Microsoft Office Professional Plus 2007, Microsoft Office Enterprise 2007, the Windows Vista Enterprise Edition, Microsoft Core Client Access License, and Microsoft Enterprise Client Access License.
- Additional products with a broad selection of Microsoft business software products. Examples of products offered as additional products include Microsoft Office Visio® 2007 drawing and diagramming software, Microsoft Office Project, Windows® servers, and Exchange servers.
- A predictable, annual price per desktop for enterprise products based on the initial number of desktops enrolled.
- An annual True Up so that organizations can run software on desktops as they are acquired, then pay a predetermined price for the software licenses annually for the remaining term of the enrollment.
- Equal, annual payments for a three-year enrollment term, with a renewal option of one year or three years.
- Step Ups allow you to migrate your software license, giving you the flexibility to upgrade software as your organization needs increase over time.

Enterprise Agreement Benefits

Minimize Cost, Maximize Value

The Enterprise Agreement helps you reduce the cost of IT computing and get the most out of your software investments through benefits, including:

- The right tools and resources that can help your IT staff and employees be more productive.
- Upgrade rights to the latest technology through Software Assurance.
- The ability to standardize your IT choices across the organization, so you can tap into the latest technology at a substantial savings.

- Spread payments during a three-year term helps to streamline your budgeting process, giving you the flexibility you need to improve your bottom line. You can also license additional software product licensing as needed at the original order price covered under your agreement terms.
- Software Assurance benefits that offer a broad range of tools, services, and solutions to help you get the most out of your software investments.

More Value by Design

Reduce the time spent managing your software licenses. With the Enterprise Agreement, you can do the following:

- Eliminate the need to count individual licenses; you just count the number of desktop PCs, making it easier to manage and track licenses.
- Streamline the procurement process; you only need to place one order annually.
- Make administration and budgeting processes easier by centrally tracking purchases and managing licenses with online management tools.
- Centralize your purchasing so that you can share software products and extended benefits with qualified affiliates.

A Program that Keeps Pace with Your Business

With the Enterprise Agreement, you can be confident that your IT infrastructure can adapt and grow with your organization's evolving needs through benefits such as the following:

- Access to the latest technology—Microsoft® Office Professional Plus 2007, Microsoft Office Enterprise 2007, the Windows Vista™ Enterprise Edition, Core Client Access License (CAL) Suite, and Enterprise CAL Suite.
- The software, tools, and resources you need to build and maintain a responsive and flexible IT infrastructure.
- The opportunity to evaluate any software product for 60 days before you commit.
- The ability to license additional software products under the terms of your original agreement to help you respond rapidly to changing business needs while keeping costs predictable.
- Software Assurance facilitates simple migration of software products, such as Office Professional Plus 2007 to Office Enterprise 2007 by providing access to a Step Up License. This allows for the upgrade of the License & Software Assurance portion to the higher edition, eliminating the need to license two separate software editions to benefit from the upgrade edition. For more details on how you can maximize your investment with Software Assurance benefits, go to <http://www.microsoft.com/licensing/programs/sa/default.aspx>

Enterprise Agreement Program Features

Enterprise Products

The Enterprise Agreement offers organizations access to the most recent releases of the Desktop Professional Platform products. The Enterprise Agreement Desktop Platform products are:

- Microsoft Windows Vista Enterprise Edition
- Microsoft Office Professional Plus 2007 and/or Microsoft Office Enterprise 2007
- Microsoft Core Client Access License Suite or Enterprise Client Access License Suite

Why consider enrolling in the full desktop platforms?

Organizations benefit from building both simplicity and flexibility into their information technology infrastructure. For many organizations, the first step toward achieving this is to adopt the Microsoft platform as the core of its software infrastructure.

The Professional and Enterprise Platforms offer products that are integrated and optimized. Microsoft software products are optimized to work seamlessly together. For example, a common programming model is used to improve information sharing between applications.

The full platform leverages a consistent interface for users, developers, and administrators that help improve productivity and reduce costs. Common commands, menus, windows, and interchangeable models should improve training and development. In addition, strong vendor and developer support offered by both Microsoft and our partners for software applications will help increase flexibility.

New customers who enroll in the Professional or Enterprise Platform (the Windows Vista Enterprise Edition operating system upgrade, Office Professional Plus 2007 and/or Office Enterprise 2007, and Core CAL Suite or Enterprise CAL Suite) receive an approximately 15 percent platform discount on top of their already discounted enterprise software product for eligible organizations.

Additional Products

A broad selection of software titles is available as additional products. They provide the same License & Software Assurance coverage as enterprise products, but do not require an enterprise-wide commitment. For products licensed at signing, payments can be spread throughout three years in the same way that enterprise product payments are annualized. Spreading the cost of software licenses throughout three years can help organizations to refocus critical IT budget and provide a predictable framework for budgeting purposes. Also, additional products at signing will have corresponding pricing for the use of the True Up ordering process, consolidating ordering annually.

Examples of software products available as additional products include Office Visio, Microsoft Project, and Windows servers and Exchange servers. A complete list of additional products is available on the Microsoft Product List at

<http://www.microsoftvolumelicensing.com/userights/PL.aspx>

To learn more about Product Use Rights, visit
<http://www.microsoftvolumelicensing.com/userights/PUR.aspx>

Software Assurance Benefits

The Enterprise Agreement includes Software Assurance, Microsoft's comprehensive maintenance program. Software Assurance provides access to valuable benefits such as training, deployment planning, software upgrades, and product support to help you get the most out of your software investments.

Here are details on Software Assurance benefits throughout each stage of the software lifecycle.

Stage	Benefit	Description
Plan	New Version Rights	With Software Assurance, you receive new versions of licensed products released during the term of your agreement to deploy at your own pace as they become available. You can reduce the costs associated with acquiring new version releases and immediately take advantage of the latest technology.
	Spread Payments	The Spread Payments benefit for Software Assurance can help offer a more flexible way to manage technology expenditures by enabling you to spread payments annually over the duration of your coverage. This benefit can help to reduce initial software expenditures and forecast annual software budget requirements up to three years in advance.
Deploy	Packaged Services: Desktop Deployment Planning Services	Desktop Deployment Planning Services can provide your company with a collaborative and comprehensive consulting engagement based on best practices from Microsoft. Your dedicated consultant will introduce you to advanced techniques, processes, and tools and will work with you to identify your unique business needs and help you create a comprehensive deployment plan.
	Information Work Solution Services	Microsoft Information Work Solution Services can help identify opportunities for you to increase your organization's productivity and help you to better take advantage of the capabilities of your IT infrastructure. Services are delivered by a Microsoft Partner of your choice. Microsoft Information Work Solution Services provide a direct and focused approach designed to help improve the effect that individuals, teams, and organizations have on your business.
Use	Training Vouchers	You will receive training vouchers for technical training on select courses from Microsoft Certified Partners for Learning Solutions (CPLS), the Microsoft-authorized training channel for delivering learning products and services on Microsoft technology. Training is designed to help IT staff and developers prepare for deployment, enable smoother migration, and stay up-to-date with the latest Microsoft technologies.
	E-Learning	Microsoft's E-Learning provides your employees access to individual, on-demand Microsoft software courses via a secure, Microsoft-hosted web site. E-Learning can be accessed online or offline and includes simulations, hands-on exercises, and learning assessments.

	Home Use Program	The Home Use Program is designed to help increase employee productivity and satisfaction, help support your organization's flexible work arrangements, while also helping to maximize the value of your Microsoft Office desktop investment. Eligible employees may obtain a licensed copy of most Microsoft Office desktop programs to install and use on a home computer during the term of your Software Assurance coverage.
	Microsoft Windows Vista Enterprise Edition	Windows Vista Enterprise is available exclusively to Software Assurance customers. This premium desktop operating system is designed to help medium-sized and large organizations with complex IT infrastructures lower IT costs, reduce risk, and stay connected. Building on the features in Windows Vista Business, Windows Vista Enterprise can help provide higher levels of data protection using hardware-based encryption technology. It also includes tools that are designed to improve application compatibility and enable organizations to standardize by using a single worldwide deployment image.
	Microsoft Employee Purchase Program	The Microsoft Employee Purchase Program gives your employees discounts off the retail pricing of Microsoft productivity and consumer products. Employees can save money over retail pricing on software products for home management and entertainment, including Windows Vista, Microsoft Office, Xbox games, and Zune (US only). Products can be ordered directly through a password-protected Microsoft-hosted e-commerce site.
Maintain	24 X 7 Problem Resolution Support	With Software Assurance, you can have direct access to Microsoft for your support needs. You can select the right level of help when you need it with business-critical 24 hours a day, 7 days a week phone support for all Microsoft server products, Windows, and the 2007 Microsoft Office system, in addition to unlimited Web support.
	TechNet Subscription Through Software Assurance	TechNet is a web-based support resource for IT professionals that can provide convenient online access to Microsoft experts and information about software and technology. This comprehensive resource can help your staff keep technical skills sharp, assist with resolving mission critical and day-to-day issues, more easily maintain security, and evaluate new Microsoft technologies.
	"Cold" Backups for Disaster Recovery	With the "Cold" Backups for Disaster Recovery benefit, mission-critical IT solutions are better protected and preserved in disaster recovery situations. In the event of a disaster, your organization receives complimentary "cold" backup server licenses for every production license with Microsoft Software Assurance coverage.

Transition	Extended Hotfix Support	Enter into Extended Hotfix Support Account (EHSA) as hotfix issues arise. Annual fees and required sign-up periods associated with EHSA are waived for Software Assurance customers, which can reduce support costs.
	Windows Fundamentals for Legacy PCs	Microsoft Windows Fundamentals for Legacy PCs, available exclusively to Microsoft Software Assurance customers, is a small-footprint Windows-based operating system solution designed for customers who have older computers running earlier operating systems and who are not in a position to purchase new hardware. This solution can help provide the same security and manageability as Windows XP Service Pack 2 (SP2) while smoothing the migration path to the latest hardware and operating system.

For more information about Software Assurance benefits, please visit:

<http://www.microsoft.com/licensing/sa>

Software Assurance Renewal

To ensure the continued benefits provided by Software Assurance, all Software Assurance covered products must be renewed within 30 days of an Enterprise Agreement enrollment expiration. If transitioning from a pre-6.0 Enterprise Agreement enrollment, see the Product List for timeframes to enroll those products covered under that Enterprise enrollment.

Product Use Rights

<http://www.microsoftvolumelicensing.com/userights/PUR.aspx>

Agreement Details

Agreement Term

Each Enterprise Agreement enrollment term has a three-year term providing you with a defined amount of time that the terms and prices of your purchasing relationship with Microsoft will remain consistent for all products covered in the initial order. This gives you the ability to plan and budget for software license purchases up to three years in advance, reducing annual budget restrictions and easing fiscal year spending challenges. Each enrollment has the option for either a one- or three-year renewal term.

Annual Price per Desktop

The annual price per desktop feature of the Enterprise Agreement provides a predictable budgeting framework that you can use to forecast desktop technology costs up to three years in advance. A payment (based on the pre-established price per desktop and initial order), is due each year at the anniversary date of your Enterprise Agreement enrollment. Because you pay

for your software licenses once annually, the costs normally associated with software license acquisition are reduced. In most cases, the number of software license purchase orders made annually is reduced from hundreds to two or three total. The predetermined price paid for software licenses covered in your initial order protects you from unanticipated price increases, making it easier to stay within your software budget.

True Up

During the time you are enrolled in the Enterprise Agreement enrollment, it is likely that your business will grow and you will add desktop PCs. When you add desktop PCs, they immediately get the same license coverage as the desktop PCs enrolled at the beginning of the agreement term. You just report added desktop PCs through an annual process, called a “True Up” order. True Up orders consolidate orders for additional software licenses run during the year under one order annually (including the third year before any renewal). Customers have the additional option of truing-up multiple times throughout the year as an added benefit in managing costs. This feature is in addition to the annual True Up required each year.

The annual True Up feature helps reduce time and expense by consolidating the report of multiple additional software use under one purchase order.

If there are no desktop PCs added during the year, an update statement is reported to alert Microsoft not to expect a True Up order.

Step Up

With an Enterprise Agreement, it is possible to migrate from Standard Edition software products to Professional or Enterprise Edition software products while maintaining Software Assurance coverage on a given product. The Step-up License is available to make it easier to upgrade from a Standard to Enterprise Edition without incurring the full cost of licensing two separate editions of software products.

Qualification to Obtain the Step-up License

To obtain the Enterprise Edition Step-up License for server software, Microsoft Project, and Microsoft Office Visio, you will need an Enterprise Agreement that includes a Standard Edition License for the software.

Step-up License Pricing

The Step-up License price is the difference between the License and Software Assurance price of the Enterprise Edition software products and the Standard Edition software products. For a new Enterprise Enrollment, the step-up price is spread out in equal annual billings for the duration of the customer’s enrollment term. For Enterprise Enrollment customers who step up part way through the enrollment term, the billing is paid at the time the step-up is acquired.

Additional Value-Adds

Take advantage of these additional features in the Enterprise Agreement to help boost the value received by participating in the program:

Commitment on Use Rights provide Enterprise Agreement customers the security of knowing exactly what the use rights are for the products they license under their Enterprise Agreement enrollment. Microsoft agrees not to change Product Use Rights for any version of a product after

it becomes available. Furthermore, we make a commitment that we will not change use rights for enterprise products during the term of an enrollment to be more restrictive or to the customers' detriment (this commitment does not relate to new features and functionality).

Training and Evaluation Licenses helps your budget for software training and evaluation purposes go farther by offering a limited number of complimentary training and evaluation copies of any product.

- 20 copies per software title for use in a dedicated training facility, and
- 10 copies per software title for a 60-day evaluation

Downgrade Rights provide businesses with version standardization considerations and the flexibility necessary to purchase a license for the latest software version available, but run a previous version.

Re-Imaging Rights allow the use of certain software media for re-imaging to provide added convenience during product rollouts.

Secondary Use Rights allow employees to be more productive by sharing the same application license for any additional software product on a work PC as well as a portable PC for work-related purposes only.

NOTE: For full details, please reference the Enterprise Agreement Program Guide at <http://www.microsoft.com/licensing/programs/ent/default.aspx>.

Agreement Structure

The laborious process of negotiating terms and conditions common to multiple agreements is streamlined through Microsoft's Volume Licensing agreement structure.

A perpetual Microsoft Business and Services Agreement (MBSA) define general terms and conditions common to the Enterprise Agreement and Microsoft Services. A separate license or agreement services work order is signed to cover the specific terms of the Enterprise Agreement or Services programs. This structure allows for flexible contract maintenance in the renewing of contracts and licensing Microsoft software products. A key benefit to this structure is that the contract terms common to Microsoft licensing, service, and support agreements are signed once.

Microsoft Business and Services Agreement is a perpetual agreement between the customer and Microsoft. It contains high-level terms and conditions that are applicable to all agreements signed under it. Terms and conditions such as use and ownership, confidentiality, warranties, and others can be found in the MBSA. It must be signed either with or prior to the Enterprise Agreement.

The Enterprise Agreement defines the terms for enterprise and additional product license acquisitions, subsequent orders, True Ups, and perpetual rights.

The Enterprise Agreement enrollment establishes the basic information that your organization can use to buy product licenses under the Enterprise Agreement. It defines purchase details like

the term of the licensing arrangement, products, subsidiaries, language options, and Enterprise Software Advisor (or Large Account Reseller, where applicable).

An Enterprise Agreement cannot be initiated without an MBSA, and an Enterprise Agreement enrollment cannot be initiated without an Enterprise Agreement.

Agreement Renewal

The initial term of the Enterprise Agreement enrollment is three years. At the end of the third year, the Enterprise Agreement enrollment may be renewed one time for one or three years. Renewal pricing for existing desktops is based on Software Assurance only. Contact your Enterprise Software Advisor or Large Account Reseller for additional information.

Pricing

Price Levels for Commercial Organizations

The total quantity of initial qualified desktop PCs when you enroll in the Enterprise Agreement determines the price level of your enterprise products and any additional products that you license under the corresponding product pool.

Price Levels for Government Organizations

Eligible government organizations receive special pricing, equivalent to the Enterprise Agreement License price level (Level D, defined below) offered to commercial organizations. An eligible government entity is defined as follows:

- Meets the eligibility requirements in your region, and
- Your government, as an aggregated whole, will be licensing 15,000 desktop PCs. Note that this requirement is per government entity, not per agreement, so the requirement can be met with multiple agreements totaling a minimum of 15,000 licenses.

Government eligibility requirements are available at:

<http://www.microsoftvolumelicensing.com/userights/DocumentSearch.aspx?Mode=3&DocumentTypeId=6>

Qualified Desktops and Qualified Users

As part of your enrollment, you are responsible for reporting the number of qualified desktops in your organization. This number is the quantity you indicate on the initial order at signing, along with any additional desktop PCs added throughout the term of your enrollment, which would be covered by submitting the annual True Up order. (For an explanation of True Up, see the preceding section.)

Qualified desktop PCs are the personal desktop computers, portable computers, workstations, and similar devices that are used by or for the benefit of an enrolled affiliate (including affiliates in the enterprise) and meet the minimum requirements for running any of the enterprise products included in your agreement.

The user count may be different than the quantity of the desktop PC, but the price level is determined by the desktop PC count. For example, a customer may have 500 desktop PCs and

400 users. The price level would be A for both, but the product order would indicate 500 for the windows or office product, and 400 users for the user CAL purchases.

Customers who sign an Enterprise Agreement enrollment are referred to as an “enrolled affiliate.” An enrollment is a standard option giving global companies greater flexibility in defining their enterprise. Each enterprise must consist of entire legal entities, not partial entities such as departments, divisions, or business units. Each affiliate must be entirely “in” or entirely “out.”

Qualified desktop PCs do not include any computers dedicated to run only line-of-business software or any system running an embedded operating system (e.g., Windows 9.x embedded or Windows XP embedded).

For commercial pricing, there are four price levels for each of the enterprise products (both desktop & user based pricing).

Level	Desktop PC's
A	250-2,399
B	2,400-5,999
C	6,000-14,999
D	15,000+

Government pricing is equivalent to level D in commercial pricing for eligible organizations.

If you are renewing your Enterprise Agreement then you may sign a renewal Enterprise Agreement for only the Software Assurance portion of their licenses.

Placing an Enterprise Agreement Order

Contact Microsoft to find a Microsoft Authorized Enterprise Software Advisor (ESA) or a Microsoft Authorized Large Account Reseller (LAR) to assist you with acquiring licenses under the Enterprise Agreement. For the Microsoft ESA or LAR nearest you, please refer to: <http://www.microsoft.com/products/info/render.aspx?view=22&type=mn&content=22/licensing>

Product Fulfillment

Customized according to the languages and products selected on the Enterprise Agreement enrollment, the Welcome Kit and subsequent Update Kits offer convenience and access to a broad range of business software titles. The Welcome Kits and Update Kits are automatically provided to the contacts specified on each Enterprise Agreement enrollment. Additional media kits may be ordered from your reseller for an additional charge. Download capability is also available.

Ordering Media and Documentation

Use the Media Kit User's Guide Web site to manage the Media Kit. Access the site features via the link on: <http://licensing.microsoft.com/>.

Groupings and Color Codes

Product pools (applications, systems, and servers) are divided into seven groupings and are color coded to make them easier to organize. The following chart shows the groups and colors.

Pool	Group	Color Code	Examples
Applications	Microsoft Office Family	Blue	Microsoft Office suites and individual applications such as Microsoft Project, Microsoft Visio® drawing and diagramming software, etc.
	Developer Tools	Gold	Microsoft Visual Studio® development system, SQL Server™ Developer Edition, Office Developer, etc.
	Training and Learning	Purple	Microsoft Press® titles (Step by Step, Mastering, etc.), Microsoft Encarta® multimedia encyclopedia, etc.
	Products for Macintosh	Olive	Microsoft Office suites and individual applications for Macintosh
Systems	Windows Client: Business	Green	Windows NT® Workstation, Windows® 2000 Professional, Windows® XP Professional, Windows Vista
Servers	Server Applications	Red	SNA Server, Proxy Server, Site Server, Office Live Server, SharePoint® Portal Server, SQL Server, etc.
	Windows Servers	Aqua	Windows 2000 Servers, Windows NT Servers, and Microsoft Exchange Server

Microsoft Volume Licensing Services Tracking Tool

Online tracking through Microsoft Volume Licensing Services (MVLS) makes managing your licenses easier. The MVLS license management tool is a password-protected Web site that lets you view your license agreements and status, online records, and other license information and Software Assurance benefits. You can also download licensed products and manage your Software Assurance benefit entitlements. You can access the MVLS site at <http://licensing.microsoft.com>. You will need a Windows Live™ ID to access the site.

You can also access the Product Licensing Web using MVLS. This Web site gives you access to licensing terms, conditions, and supplemental information relevant to using products licensed through Microsoft Volume Licensing programs. You can find information for a particular product all on one Web page. This information is direct from the Microsoft Licensing Product Use Rights (PUR) and the Microsoft Product List for Volume Licensing documents, which include general and product-specific use rights, product point information, and product notes. You will also find supplemental materials that can help you better understand how Microsoft licenses each product.

Glossary

Affiliate

An organization or legal entity that owns and controls, is owned and controlled by, or is under common ownership and control with, the customer signing an MBSA.

Effective Date

The agreement or enrollment start date.

Enterprise Agreement (EA)

Enterprise Agreement refers to Microsoft's Volume Licensing offering that gives customers that want to license one or more of Microsoft's platform products across their enterprise the means to ensure that their entire enterprise will be licensed.

Enterprise Software Advisor (ESA)

An entity authorized by Microsoft and engaged by an enrolled affiliate to provide Enterprise Agreement pre and post-sales assistance.

Enrollment

A Microsoft document that allows qualifying affiliates to sign up for enterprise enrollment under an existing Enterprise Agreement and acquire licenses for Microsoft products.

License

Any one of those offerings identified in the Product List located at <http://www.microsoftvolumelicensing.com/userights/PL.aspx> (including standard licenses and upgrades for desktop operating systems) that provides the right to run the version of the product for which it is ordered.

License & Software Assurance

Combines the License and Software Assurance under a single stock-keeping unit (SKU).

Microsoft

The contracting Microsoft affiliate under a Microsoft Business and Services Agreement, Enterprise Agreement, or enrollments and its affiliates.

Pools

Microsoft products available through volume licensing programs are categorized as applications, systems, or servers products. For commercial organizations, prices are established according to the volume levels acquired in each category or “pool,” also referred to as the applications pool, systems pool, and servers pool.

Product List

A document that identifies the Microsoft products that is available or may be available under the volume licensing programs and any product-specific conditions or limitations on the acquisition of licenses for those products.

Renewal Period

The one- or three-year period after the expiration of the original term of the Enterprise Agreement enrollment.

Software Assurance

Provides the right to run the latest version of licensed product and the ability to spread payments annually. Also includes tools, support, training, and other benefits.
